DHA Gobo Holders are blackened to maximise their optical performance

Use of B size gobo recommended if full image must be resolved

Use of D size gobo recommended if full image must be resolved

3 Use of M size gobo recommended if full image must be resolved

Use holder supplied with luminaire

Will not resolve full image area - if full sharp image is vital please consult our customer service team

Glass gobos require special care and may not be suited to all lanterns in the range

No gobo holder required

Gobo must be glued in to holder supplied with luminaire

Many luminaires will not resolve the full image area and some clipping of the extreme edges may occur. The sizes recommended here are the best option available but if a complete and perfectly sharp image is required please refer to us for further advice. For luminaires not listed above please contact one of our customer service staff.
